

## END OF THE RESTRICTION OF VISITS IN THE ANTOINETTE-MALOUIN UNIT (CHSLD) AND IN THE BLANC-SABLON SHORT-TERM CARE UNIT

**Blanc-Sablon, August 17<sup>th</sup>, 2020** – The Centre intégré de santé et de services sociaux (CISSS) de la Côte-Nord wants to inform the population that the restriction of visits in the Antoinette-Malouin unit (CHSLD) and in the Blanc-Sablon short-term care unit is now lifted.

These measures were put in place to protect the residents and the population in the presence of several cases of gastroenteritis.

We want to remind you that washing your hands with soap and water remains the best way to prevent the transmission of gastroenteritis, and that nobody who shows signs of cough, vomiting or diarrhea should come visit someone.

If you are worried about your condition or that of one of your relatives, and you have questions or concerns, you can call 811 at all times to reach Info-Santé and receive some advice. You can also consult this [decision assistant](#), issued by the ministère de la Santé et des Services sociaux.

The CISSS de la Côte-Nord wants to thank the population for its collaboration.
